The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
- **Material of gloves**
Chemical-resistant protective gloves (EN ISO 374).
Minimum layer thickness: 0.5 mm
Permeation time (breakthrough time): 480 min
The breakthrough times determined according to EN 16523-1 were not carried out under practical conditions.
A maximum wearing time corresponding to 50 % of the breakthrough time is recommended.
Nitrile rubber, NBR
Butyl rubber, BR
Chloroprene rubber, CR
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

- **Serious eye damage/irritation** Based on available data, the classification criteria are not met.
- **Respiratory or skin sensitisation**
 Trimethoxyvinylsilane (CAS: 2768-02-7) is classified as a skin sensitizer category 1B (Skin Sens. 1B) according to Annex VI of Regulation (EC) No 1272/2008 based on vivo data with laboratory animals. However, no allergic reactions were observed after occupational contact. Mixtures with trimethoxyvinylsilane (up to 5% active substance) in polymers of different viscosities were tested in the "local lymph node assay" (OECD 429). None of the mixtures showed a sensitising potential. This result serves as the basis for our expert assessment, taking into account the entire composition when classifying and labelling polymer mixtures.
- **Germ cell mutagenicity** Based on available data, the classification criteria are not met.
- **Carcinogenicity** Based on available data, the classification criteria are not met.
- **Reproductive toxicity** Based on available data, the classification criteria are not met.
- **STOT-single exposure** Based on available data, the classification criteria are not met.
