#### Trade name: Seal-it® 350 Super-All

CAS: 1760-24-3 EINECS: 217-164-6 Reg.nr.: 01-2119970215-39-XXXX N-(3-(trimethoxysilyl)propyl)ethylenediamine � Eye Dam. 1, H318; � Skin Sens. 1, H317; STOT SE 3, H335

(Contd. of page 1) ≥0.1–<1%

Additional information: For the wording of the listed hazard phrases refer to section 16.

# **SECTION 4: First aid measures**

<sup>.</sup> Description of first aid measures

• After inhalation: Supply fresh air; consult doctor in case of complaints.

- After skin contact: Generally the product does not irritate the skin.
- After eye contact: Rinse opened eye for several minutes under running water.
- After swallowing: If symptoms persist consult doctor.
- Most important symptoms and effects, both acute and delayed No further relevant information available.
- · Indication of any immediate medical attention and special treatment needed No further relevant information available.

### **SECTION 5: Firefighting measures**

- Extinguishing media
- Suitable extinguishing agents: Use fire extinguishing methods suitable to surrounding conditions.
- Special hazards arising from the substance or mixture *No further relevant information available.*
- Advice for firefighters
- · Protective equipment: No special measures required.

# **SECTION 6: Accidental release measures**

· Personal precautions, protective equipment and emergency procedures Not required.

- Environmental precautions: Do not allow to enter sewers/ surface or ground water.
- Methods and material for containment and cleaning up: Pick up mechanically.
- · Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

# **SECTION 7: Handling and storage**

• **Precautions for safe handling** *No special precautions are necessary if used correctly.* • **Information about fire - and explosion protection:** *No special measures required.* 

· Conditions for safe storage, including any incompatibilities

<sup>·</sup> Storage:

- Requirements to be met by storerooms and receptacles: No special requirements.
- · Information about storage in one common storage facility: Not required.
- · Further information about storage conditions: None.
- Storage class: 13

(Contd. on page 3)

(Contd. of page 2)

#### Trade name: Seal-it® 350 Super-All

• **Specific end use(s)** No further relevant information available.

# SECTION 8: Exposure controls/personal protection

- · Control parameters
- · Ingredients with limit values that require monitoring at the workplace:

#### CAS: 13463-67-7 titanium dioxide

WEL Long-term value: 10\* 4\*\* mg/m<sup>3</sup>

\*total inhalable \*\*respirable

• Additional information: The lists valid during the making were used as basis.

- · Exposure controls
- Appropriate engineering controls No further data; see section 7.
- · Individual protection measures, such as personal protective equipment
- · General protective and hygienic measures: Wash hands before breaks and at the end of work.
- · Respiratory protection: Not required.

#### · Hand protection

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

#### Material of gloves

Chemical-resistant protective gloves (EN ISO 374).

Minimum layer thickness: 0.5 mm

Permeation time (breakthrough time): 30 min

The breakthrough times determined in accordance with EN 16523-1 were not carried out under practical conditions.

A maximum wearing time corresponding to 50 % of the breakthrough time is recommended. Nitrile rubber, NBR

Butyl rubber, BR

Chloroprene rubber, CR

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

- Eye/face protection

Tightly sealed goggles

# **SECTION 9: Physical and chemical properties**

Information on basic physical and chemical properties

### · General Information

<sup>.</sup> Physical state

Solid
