SEAL-IT®
ACCESSORIES

Connect Products provides certified Seal-It® sealants, adhesives,
PU foams and accessories, offering custom technology solutions for specific constructions
and industrial applications.

Seal-it® products are specially developed for professionals, are high-quality, durable,
efficient, environmentally and user-friendly, and guarantee secure bonds and optimal
results that last for years. Seal-it®, when quality is key!

Connect Products boasts a highly dedicated and experienced organisation, distinguished
by its quality, knowledge and service. Please feel free to contact us with any questions or
requests. Our team of specialists is ready to assist you in any way they can.

This product catalogue reflects the selection of products currently available.

Our strength lies in our dedication to service and the customer, our flexibility, brainstorming with the customer, optimal logistics, short delivery times, expertise, advice, knowledge sharing, project support and long-term product warranties. Customer-satisfaction is our goal!

Serving the World
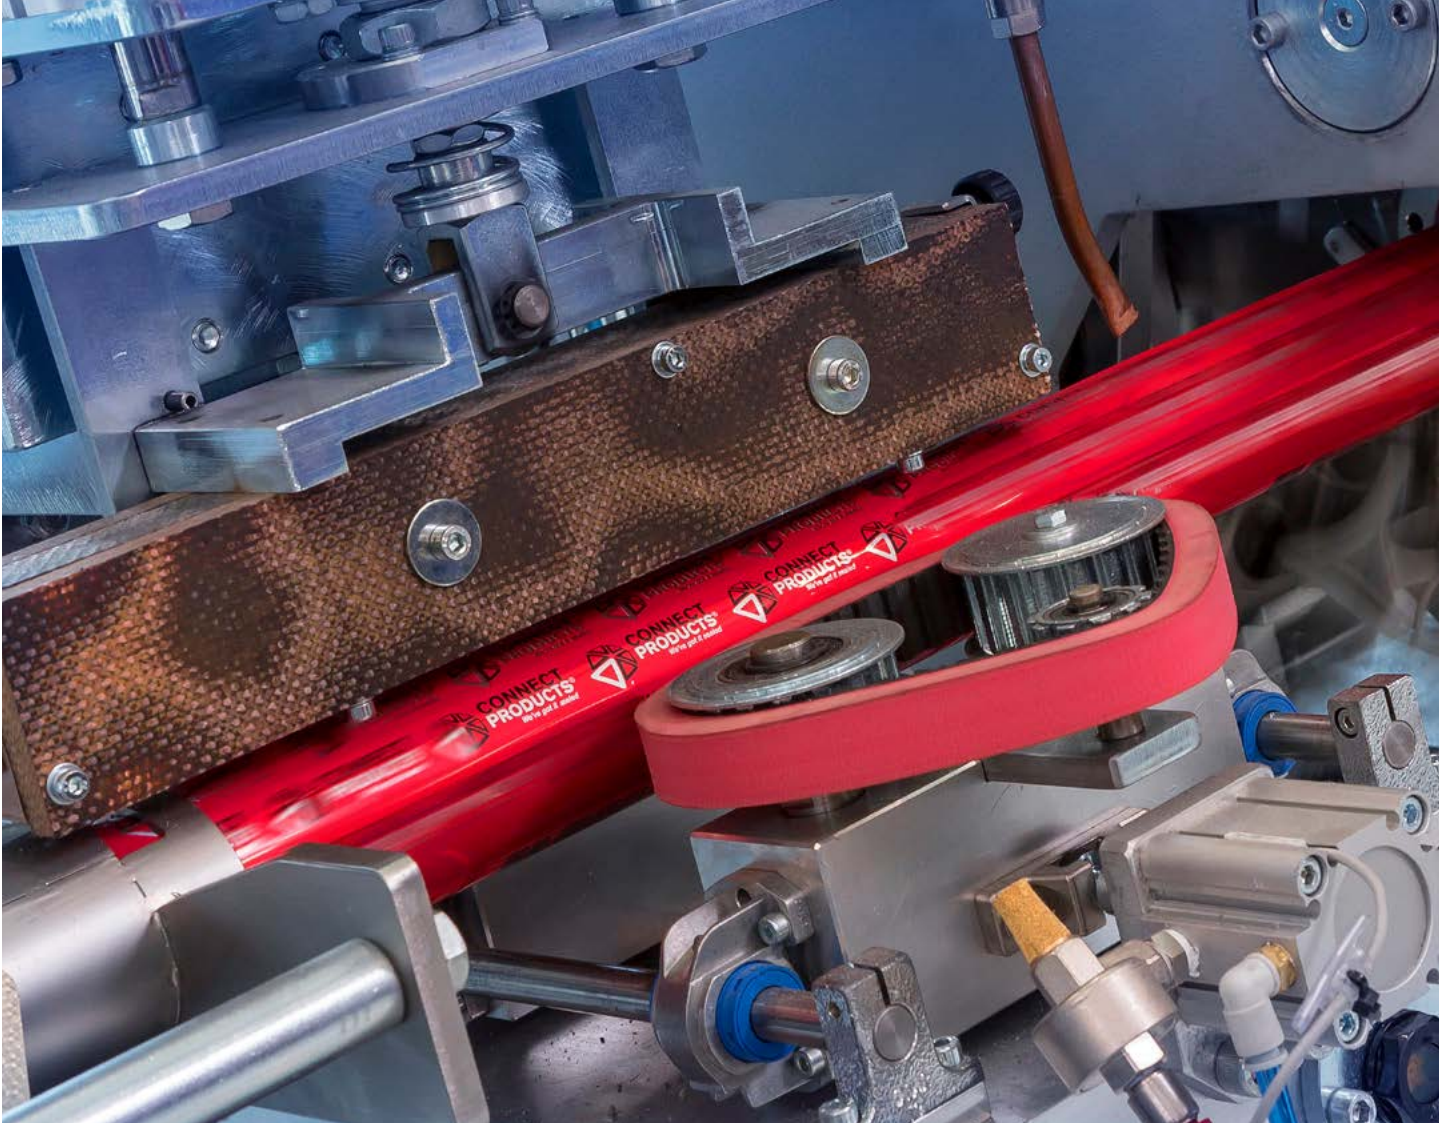

Technology, practical knowledge and customer desires provide the foundations for our product development, resulting in a broad and specialised product line. Seal-it® products guarantee top quality at all times and durable and efficient solutions, for successful applications in construction, renovation and maintenance projects.

Seal-it® high-end products are always designed based on thorough research and effective development, according to the latest state-of-the-art and findings, and with a constant focus on quality and innovation.

Superior sealants, adhesives, PU foams and accessories for professionals. Seal-it® products are certified, versatile, available in a variety of colours, environmentally and user-friendly, durable, efficient and well-positioned on the market, and meet all applicable standards and regulations. Seal-it® high-performance products guarantee quality and results, for secure and durable bonds, in construction, façades, glazing, sanitary and industrial applications.

Useful tips

Sealant consumption guidelines

Recommended joint dimensions		Number of running metres		Sealant consumption per 100 running metres	
width mm	depth mm	per cartridge	per foil pack	number of cartridges	number of foil packs
5	8	7,80	15,09	13	7
7	8	4,80	9,29	21	11
9	9	3,10	6,00	32	17
11	10	2,60	5,03	39	20
13	10	2,10	4,06	48	25
15	11	1,70	3,29	59	30
17	12	1,60	3,09	63	33
19	12	1,50	2,90	67	35
21	13	1,00	1,94	100	52
23	14	0,90	1,74	111	57
25	14	0,80	1,55	125	65

The above mentioned sealant consumption figures are based on net consumption. In practice, material losses may range from 0% to 30%, depending on the joint type and dimensions, and the method used with the sealant applicator in question.

Joint dimensioning

The joint depth is dependent on the joint width and is simple to calculate using the formula below.

Joint depth = Joint width : 3 + 6 mm

Example
For a joint width of 18 mm, the proper joint depth is:

18 mm : 3 + 6 mm = 12 mm

Seal-it® 540 BACKER ROD FOAM can be used to apply Seal-it® sealants to the proper joint depth – see detailed drawing.
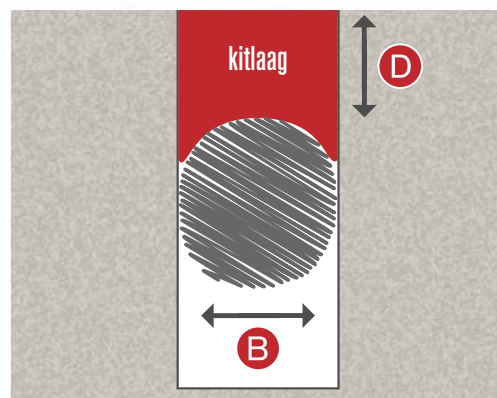

B = Joint width   **D** = Joint depth
